

## Press Release

### **Provis 2020 Sustainability Initiatives Reduce 16,000 tons of CO2 Emissions and Saves AED 6.5 Million**

- *36 Million KWH of energy saved from electricity and chilled water consumption*
  - *Doubled utility savings in 2020 compared to last year*
- *Achieved 16% in electricity and chilled water consumption savings during the last two years*

**Abu Dhabi, 30 December 2020** - Leading estate management company Provis announced that it has achieved substantial energy and cost savings worth over AED 6.5 million across 12 managed communities in 2020. The significant achievement was realized after implementing several sustainability initiatives that led to the reduction of more than 16,000 tons of carbon emissions and conserving 36 million kWh of total energy from electricity and chilled water consumption, enough to power 5,000 rural homes for a whole year.

H.P Aengaar, CEO at Provis said, “Provis consistently implements high impact sustainability initiatives that help preserve our natural resources and reduce unnecessary carbon emissions while also driving down operating costs. This achievement is a testament to our team’s in-depth expertise and reflects our commitment to work smartly and efficiently to benefit our clients, the environment and the wider community. “

He added, “By adopting sustainable practices during 2020, starting from design all the way through to implementation, we were able to save AED 6.5 million worth of energy, doubled utility savings and decrease carbon emissions by 50% compared to last year, and achieved 16% in electricity and chilled water consumption during the last two years. We also aim to increase the energy savings in our communities by more than 15% during the next two years.”

Sustainable projects implemented include water and electricity optimization initiatives, data analytics of assets and cooling optimization, installation of energy efficient LED lights and use of water conservation techniques employing weather-based irrigation systems and the use of Treated Sewage Effluent for irrigation purposes that led to water savings worth AED 1.3 million. The company also made use of its real-time cloud-based Building Management System (BMS), which alone is projected to save 4% to 6% of energy and operating costs annually.

The sustainability measures were rolled out across 12 Provis managed communities including Gate & Arc Towers, Sun & Sky Towers, Al Muneera, Al Zeina, Al Bandar, Al Raha Gardens, Golf Gardens, Alghadeer, Al Bateen Park, Al Gurm, Ansam, Golf Gardens and Al Hadeel.

Earlier this year, Provis's commitment to sustainability saw its headquarters in Abu Dhabi being awarded with the Leadership in Energy and Environmental Design (LEED) Platinum Certification by the US Green Building Council (USGBC). The head office also received the highest level of points in LEED Interior Design and Construction (ID+C) Commercial Interiors certification in the GCC region, becoming the fourth project in the world to achieve 90 points in the USGBC rating, across all sectors.
